What we do.

VB Engineering delivers Brownfield Digital Engineering across five locked disciplines. Each is led by a CEng MIE practice lead. Each is reviewed by a CEng MIE FIE independent principal. Every deliverable is audit-ready, regulator-ready, lender-ready.

Power System Studies

Load Flow · Short Circuit · Arc Flash IEEE 1584-2018 · Protection Coordination · Stability · Harmonics · Motor Starting. ETAP + DigSILENT + PSCAD.

3D LiDAR Scanning

Leica RTC360 + tripod and drone capture. 50,000+ scans across 21 countries. Native to brownfield as-built and digital twin handover.

As-Built Engineering

P+ID · isometric · GA · process drawings reconciled to field. 3,000+ km of P+ID delivered. The LiDAR-powered productized practice.

FlexSim Discrete Event Simulation

Manufacturing flow · ports · mining · healthcare · airports. ASA VV+A discipline. The simulation that drives capital decisions.

Risk + Safety + AMC

HAZOP · QRA · LOPA · SIL · Arc Flash AMC. Including 5-year NFPA 70E recertification retainer.

Eight industries. Twenty-one countries.

Industries served.

- Oil + Gas (refining, petrochem, LNG, upstream)
- Power Generation (thermal, renewables, transmission, data centre power)
- Pharmaceutical
- Heavy Manufacturing (steel, cement, chemicals)
- Mining + Metals
- Ports + Logistics
- Automobile + Process Manufacturing
- Data Centres (emerging hero vertical)

21-country delivery footprint.

India	Hyderabad HQ + 9 site offices
USA	Houston + Katy, Texas
UAE	Dubai + Abu Dhabi
KSA	Riyadh + Eastern Province
Qatar	Doha
Australia	Perth · mining + LNG
Singapore	SEA hub
Kuwait + Oman + Bahrain	GCC operating-company practice
UK	London channel + Europe
China	Shanghai operations
Indonesia + Malaysia	SEA energy + mining
